Forecast for Wednesday 27 Nov 2024

Weather: Rain spreading north, mainly light and patchy but perhaps a bit more persistent for a few hours around southern areas. Rain tending to die out and clear east soon after dawn breaks, cloudy at first but cloud thinning and breaking. Brighter in the afternoon with light winds and sunny spells, feeling cold with freezing level lowering to around 800m.

Chance of cloud-free hill tops above 800m: 40% improving to 90% cloud associated with early rain.

Low Cloud and visibility: Broken cloud layers above 500m at first but the cloud bases lifting and thinning with just scattered cloud above 700m by mid morning, cloud continuing to lift and clear through the morning and by afternoon only patchy low cloud at times on the highest tops. Visibility will be poor initially in rain but will gradually improve during the morning and very good visibility is likely in the afternoon.

Meteorologist's View

Feeling cold out on the mountains but weak winter sunshine in the afternoon will provide plenty of brightness.

Forecast for Thursday 28 Nov 2024

Weather: A bright and sunny day but increasing cloud later in the day and strengthening Southeasterly winds.

Maximum wind: Easterly 5-10 mph increasing Southeasterly 20mph gusts 30mph by late afternoon

Chance of cloud-free hill tops above 800m: 90% cloud mainly above all summits.

Low Cloud and visibility: Very little cloud below summits, perhaps some patches from time to time. Very good visibility turning hazier by late afternoon.

Temperature: **Valleys:** Zero rising to Plus 5 Celsius.
 At 800m: Zero Celsius rising to Plus 3 Celsius later.
 Freezing level: 800m
